

## **Vision for Texas Schools**

**Victor Sampson is running for the Texas State Board of Education because our students and teachers deserve better and because the future of Texas depends on schools that inspire, challenge, and empower young people to change the world.**

A former classroom teacher, education researcher, and national leader in innovative teaching, Victor brings more expertise in education than any other candidate in the race. He has spent more than 20 years helping teachers create classrooms where students learn to *think*, not just memorize.

Victor is offering a bold, hopeful vision for Texas schools: one where students' strengths, rather than their perceived deficits, guide instruction; where teachers are trusted as professionals; where standards prioritize curiosity, problem-solving, and real learning; and where policies are driven by research rather than politics or personal ideology.

He is running because the status quo is not working. The current direction of Texas education policy is misguided and risks doing lasting harm. Victor will disrupt that status quo, not with obstruction, but with new ideas, innovative solutions, and a deep commitment to what truly works in classrooms.

As an SBOE member, Victor will fight for high-quality academic standards that develop thinkers, not test-takers; schools that center student belonging and motivation; accountability that measures inspiration, opportunity, and support and not just test scores; and a system that empowers teachers to grow, collaborate, and lead.

**Victor Sampson is the candidate of hope, expertise, and meaningful change and he's ready to help Texas build the schools our students deserve.**
